enough to support insects that crawl across the water's surface, like water striders (Gerridae). The attraction of water molecules to other substances, like soil or glass, is called adhesion. As drops of water are added onto a penny, the adhesive force between the water and the penny keeps the water from falling off. Drops on a Penny Though gravity is trying to pull all the water molecules down, toward the surface of the penny, the hydrogen bonds keep the water droplet in a spherical shape. Because alcohol is so much less polar, it can't resist gravity, and all of the molecules are pulled down into a flat sheet over the penny's surface. Polar Water v.
