Reasons For Seasons Answer Key Why do the seasons change? So we know that the earth is spinning on its axis one full turn every 24 hours. At the same time, the earth is also moving around the sun in an elliptical or egg-shaped orbit that takes one full year or 365 days to complete. The Reasons for the Seasons: Questions, Answers and ... When the days and nights are equal? When the Sun is at its lowest or highest. When the Sun moves. When we don't see any light for 6 months. Reasons for the Seasons | Earth Sciences Quiz - Quizizz If this were the case, it would be hotter in the northern hemisphere during January as opposed to July. Instead, the seasons are caused by the Earth being tilted on its axis by an average of 23.5 degrees (Earth's tilt on its axis actually varies from near 22 degrees to 24.5 degrees). Here's how it works: What Causes the Seasons? - National Weather Service tilted, we would only have one season. Parts of the planet would receive the same amount of sunlight every day, so weather and climate would not change very much. Because the earth's axis is tilted, we have different seasons. As the earth orbits around the sun, the axis sometimes points toward the sun and sometimes away from the sun. Viewers' Answer Sheet Seasons Reasons.
